## GET TO KNOW ELIZABETH MAY

Beth is undertaking an apprenticeship in toolmaking within our in-house tool room

She is studying a sponsored Level 4 HNC Manufacturing Engineering and is due to undertake an HND in Manufacturing Engineering

She provides production support by configuring & setting tools as well as optimising standard operations to manufacture tools effectively

She is also trained to programme and use a CNC milling machine and a variety of other machines and ancillary equipment

## What motivated you to seek a career in toolmaking?

*"I have always been interested in engineering and working on machines. I was working on a project as part of my studies and toolmaking was suggested to me as I enjoyed working on machines."*

## What is working at Hi-Tech like?

*"I enjoy the working environment and being able to see a mould from the design, to tooling, to it being produced."*
